- Critical Thinking
- Communication Skills
- Good Intuition
- Problem Solver
- Ambition

Hobbies

- Music (Althorn/Trumpet)
- Sports (volley-ball, fotball, snowboarding, bicycle swimming, photo/video editing)

Coroian Emanuel Gabriel

Profile

I'm pursuing a degree in Economic-Informatics at FSEGA, blending analytical thinking and problem-solving with economic insights and highly motivated to excel in every role.

Adept at web designs, with skills in HTML, CSS, JavaScript, Photoshop and Figma. Eager to contribute and learn in dynamic environments.

Personal Experience

HTML, CSS and JavaScript - I acquired the knowledge for these languages from a special course on the Udemy platform, during which I made different projects that helped me to handle many difficult problems. I have posted different projects on my github account: https://github.com/CoroianEmanuel

Photoshop - I learned the basics in high school because of the profile it had, after which I started learning as much as possible on my own and doing different projects. And now I do volunteer work for the church where I help them create posters, thumbnails for YouTube, etc

Figma - I learned it by myself and managed to do a very complex project, designing a web page for a construction company.

Education

High School
2018-2022 - Technical College of Communication „Augustin Maior"
Area: Image and text processing

Batchelor's
